3.14	Suggest the closest sunny day . . . . .	14

# Chapter 1

## Introduction

### 1.1 Purpose

This document describes the plan for testing the developed system by Maccagni Giacomo and Sartori Camilla against the user requirements defined in their requirements document. So the purpose of this acceptance test is to make sure that the project complies with the requirements of requirement documents.

### 1.2 Scope

This document includes the plan, items, scope, approach, environment and procedure of MeteoCal acceptance test. Other information not related to the test activities is not included in this document. The document is addressed to either the team members, the stakeholder and the course staff.

## 1.3 Document Organization

The document is structured as follows

- *Introduction*, describes contents of this guide, used documentation during developing process etc.
- *Testing* describes the items to be tested.
- *Testing Case and Specifications*, describes the test cases and their specifications.

## 1.4 References

*Requirement Analysis and Specification Document WeatherCal* , Maccagni Giacomo, Sartori Camilla.

*Design Document WeatherCal* , Maccagni Giacomo, Sartori Camilla.

## Chapter 2

# Testing

In this section we report all the test case result according to the functional requirements specified in RASD document.

## 2.1 Features to be tested

Test Case Id	Description
TC1	Log In/Out
TC2	User Registration
TC3	Event Creation
TC4	Event Deletion
TC5	Notify Event Deletion
TC6	Event Management
TC7	Event Loading
TC8	User Invitation
TC9	Check Notifications
TC10	Manage Event Visibility
TC11	Manage Calendar Visibility
TC12	Search an user
TC13	Notify bad weather condition
TC14	Suggest the closest day with the desired weather constraint

## 2.2 Test Report and Specification

Test cases and their results are going to be documented as follows

<b>Test Case Id</b>	The ID or the number of the test case
<b>Goal</b>	Description of the test case
<b>Expected Result</b>	The result that should be observed from a succesfull test
<b>Actual Result</b>	The result which is observed after applying the test steps
<b>Conclusion</b>	F: Failed, N: Not tested, S: Succesful, M: manually tested
<b>Notes</b>	Observations regarding the test performed

# Chapter 3

## Test Case

### 3.1 Log In/Out

<b>Test Case Id</b>	TC1
<b>Goal</b>	Log in to or out from the system
<b>Expected Result</b>	The system redirects the user to its home page
<b>Actual Result</b>	The system redirects the user to its home page.
<b>Conclusion</b>	F, M
<b>Notes</b>	The system redirects the user to its home page the first time but if I log out from the system and I try to perform the login with the same credentials it results in an "OK" message without spawning to the user's page

### 3.2 Sign In

<b>Test Case Id</b>	TC2
<b>Goal</b>	Sign in to system
<b>Expected Result</b>	The system creates a new Registered User and its associated calendar
<b>Actual Result</b>	The system creates and new Registered User and its associated calendar
<b>Conclusion</b>	S, M
<b>Notes</b>	Not so much intuitive since you have the same form for the login and the title just invites you to log in. Usage of oddities inside the fields is permitted and no check is performed on that

### 3.3 Event Creation

<b>Test Case Id</b>	TC3
<b>Goal</b>	Create new event
<b>Expected Result</b>	The system creates a new Event and notify all of its participant
<b>Actual Result</b>	The system doesn't creates a new Event nor notify all of its participant
<b>Conclusion</b>	M, F
<b>Notes</b>	The system allows you to give name and notes for the event but since you are not able to select a location because of an empty result list I cannot proceed with the creation of the event. The "Back" button is not working

### 3.4 Event Deletion

<b>Test Case Id</b>	TC4
<b>Goal</b>	Delete a existing event
<b>Expected Result</b>	The system modifies the event's information
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event

### 3.5 Notify Event Deletion

<b>Test Case Id</b>	TC5
<b>Goal</b>	Notify the event deletion to its participant
<b>Expected Result</b>	The system modifies the event visibility
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event

### 3.6 Event Management

<b>Test Case Id</b>	TC6
<b>Goal</b>	Modify the event info
<b>Expected Result</b>	The system modifies the calendar visibility
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event

### 3.7 Event Loading

<b>Test Case Id</b>	TC7
<b>Goal</b>	Load the schedule of the logged user
<b>Expected Result</b>	The system correctly shows the calendar an it public event associated
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event

### 3.8 User Invitation

<b>Test Case Id</b>	TC8
<b>Goal</b>	Invite other user to the event
<b>Expected Result</b>	The system notifies the participant and the owner
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event

### 3.9 Check Notification

<b>Test Case Id</b>	TC9
<b>Goal</b>	Check the notification received
<b>Expected Result</b>	The system notifies and suggest the owner
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event

## 3.10 Manage Event Visibility

<b>Test Case Id</b>	TC10
<b>Goal</b>	Change event visibility
<b>Expected Result</b>	The system notifies and suggest the owner
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event

## 3.11 Manage Calendar Visibility

<b>Test Case Id</b>	TC11
<b>Goal</b>	Change calendar visibility
<b>Expected Result</b>	I can change the visibility of my calendar
<b>Actual Result</b>	I can change the visibility of my calendar
<b>Conclusion</b>	M,S
<b>Notes</b>	I managed to discover this functionalities by looking up directly inside the database

## 3.12 Search other user

<b>Test Case Id</b>	TC12
<b>Goal</b>	Search for other user
<b>Expected Result</b>	Redirect to the user's page and show its calendar if public
<b>Actual Result</b>	It redirects to the other user page and it always displays a calendar even if it's private
<b>Conclusion</b>	M, F
<b>Notes</b>	I can see my profile as an other user's profile

### 3.13 Notify weather conditions

<b>Test Case Id</b>	TC13
<b>Goal</b>	Notify in case of bad weather conditions
<b>Expected Result</b>	The system notifies and suggest the owner
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event

### 3.14 Suggest the closest sunny day

<b>Test Case Id</b>	TC13
<b>Goal</b>	Know the closest sunny day in case of bad weather conditions
<b>Expected Result</b>	The system notifies and suggest the owner
<b>Actual Result</b>	Cannot test
<b>Conclusion</b>	N
<b>Notes</b>	Not tested since we cannot create an event
